

## Geography

All geography students have access to the Geography dropbox which contains all the resources in an electronic format. These include keywords, exam past papers and mark schemes, all lesson Powerpoints and notes/handouts and links to other online resources relevant to A level. This is continually being updated with relevant material and students are advised to regularly access it for updates. In addition to this tutorial support is available at some lunchtimes and students are advised of what topics are to be covered when. The student run society "Keep on Geogging" will put on timely and appropriate visiting speakers and display material to support taught topics.
